Cell and Tissue Research

This journal was founded in 1924 as the *Zeitschrift für Zellen- und Gewebelehre*, from Vol. 2 (1925) it was published with the subtitle: Continuation of the Schultze-Waldeyer-Hertwig Archiv für mikroskopische Anatomie. *Zeitschrift für Zellforschung und mikroskopische Anatomie* (Vols. 1—20) (1934) as: *Zeitschrift für wissenschaftliche Biologie* (Abteilung B) edited by *R. Goldschmidt, W. von Möllendorff, H. Bauer, J. Seiler*. Vols. 2—28 (1938) edited by *R. Goldschmidt* and *W. von Möllendorff*. Vols. 29—33 (1944) as: *Zeitschrift für Zellforschung und mikroskopische Anatomie*, Abteilung A, Allgemeine Zellforschung und mikroskopische Anatomie, edited by *W. von Möllendorff* and *J. Seiler*, from Vol. 34 without the subtitle, Abteilung A, Allgemeine Zellforschung und mikroskopische Anatomie. From Vol. 36 (1951) edited by *W. Bargmann, J. Seiler*; from Vol. 53 (1960) edited by *W. Bargmann, B. Scharer, J. Seiler*; from Vol. 83 (1967) edited by *W. Bargmann, D. S. Farner, A. Oksche, B. Scharer, J. Seiler*; from Vol. 125 (1972) edited by *W. Bargmann, D. S. Farner, F. Knowles, A. Oksche, B. Scharer*. Beginning with Vol. 125 (1972) with the subtitle *Cell and Tissue Research* and beginning with Vol. 148 (1974) under the title *Cell and Tissue Research* and the subtitle *Continuation of Zeitschrift für Zellforschung und mikroskopische Anatomie*.

Published: Vols. 34—35 (1948—1950) Springer, Wien, from Vol. 36 Springer, Berlin.

Instructions to Authors

1. Manuscript should be submitted in duplicate, typed double-spaced, with wide margins and on one side of the paper only. They should be carefully prepared in the style of this journal and checked before being submitted. Typing errors should be corrected legibly.

The material should be arranged under the following headings: Introduction, Material and Methods, Results, Discussion and References. The text should be concise and consistent as to spelling, abbreviations, etc. Pages should be consecutively numbered. The desired position of figures and tables should be marked in the margin. Changes in the proofs should be kept to a minimum; a charge will be made for changes introduced after the manuscript has been set in type.

Papers must be written in English, thus ensuring the widest possible readership. Authors not wholly familiar with English usage are advised to seek the help of an English-speaking colleague. Editorial assistance with the language is available when needed. However, correct language is the responsibility of the author(s).

Manuscripts which have been heavily corrected by the copy editor will be returned to the author for retyping.

Brief accounts of particularly interesting results will be printed out of turn as "Short Communications". They should not exceed 2 or at the most 3 printed pages including a table or figure, should this be necessary. The Editors reserve the right to decide what constitutes a "Short Communication".

2. Each paper should be preceded by a **brief summary** of not more than 200 words. Authors may append a German or French summary to their manuscripts if they wish.

3. Key words. Immediately following the summary not more than 5 English key words should be supplied for subject indexing. Key words should be taken from the Index Medicus (Medical Subject Headings) or, failing this, composed on the same principles.

4. On the first page of the manuscript the author should furnish the following informations: Title, Author(s), Department, Running head (condensed title), not exceeding 72 letters and spaces, and Address to which proofs should be sent.

5. Dedications and short acknowledgements to persons and organizations should be inserted as footnotes on the first page. Footnotes which do not belong to the head of the article should be numbered consecutively.

6. Small print. Text of secondary importance, including Material and Methods, should appear in small print and must be marked as such.

7. Literature references. In the text, names of authors should be followed by the year of publication (in parentheses). Where there are more than two authors, only the first is named followed by "*et al*". All papers mentioned in the text, and only these, should be cited in the bibliography.

In the bibliography the following information should be provided for **journal articles**: names and initials of all authors, complete title of paper, name of journal (abbreviated in accord with World Medical Periodicals), number of volume, first and last pages, and year of publication.

Books are cited by listing the authors' names, full title, edition, place of publication, publisher and year.

The **bibliography**, to be placed at the end of the paper, should be in **alphabetical order**. Several publications by the same author or group of authors should be listed in chronological order; those that appear in the same year should be distinguished by the suffixes a, b, c, etc.

8. Illustrations. All figures *including graphs* are to be numbered consecutively as text figures (arabic numerals). They must be submitted in finished form on separate sheets. All should have descriptive legends. These must be typed (double-spaced) in numerical order and placed at the end of the manuscript. As with the text, a duplicate set of illustrations is necessary to facilitate editorial processing.

The number and size of the illustrations must be kept to the minimum required for clarification of the text. Previously published figures cannot be accepted. Explanations of figures furnished as legends should not be repeated in the text. Numerical data given in graphs or tables must not duplicate each other. As a rule, requests for color reproductions cannot be approved unless the author(s) bear the costs. The journal is not subsidized in any way. Therefore, when papers have **an excessive number of illustrations** (even though the editors agree that they are essential) it is necessary to ask the author, or his institution, to make a contribution toward the cost of reproduction.

From the technical point of view, there are two types of illustrations, line cuts (black and white, with no variation in tone or shading) and halftones (photographs or drawing with variations in shading). Halftones should be submitted only if line cuts (with stippling, cross-hatching, etc.) cannot adequately convey the information intended.

a) *Line Cuts.* Line drawings and graphs should be drawn in Indian ink in clean, uniform lines on smooth white paper or Bristol board. Lettering should be sufficiently large so that it will be clearly legible after any reduction that might be necessary to conform to the format of the journal.

b) *Halftones.* Micrographs must be clean, glossy prints in sharp focus and with strong contrast. They must be trimmed at precise right angles. Only one of the two sets of illustrations should be mounted for use by the engraver. It is not necessary to mount the illustrations on cardboard or Bristol board. Careful mounting on letter-size paper is quite adequate. After reduction illustrations must not exceed the printed area of one page. *Smaller figures should be grouped in plates with spaces of not more than about 1 mm between the individual figures.* Halftones should be trimmed so as to eliminate all unnecessary parts.

The lettering of electron micrographs with Letraset (instant lettering) is recommended; authors should take into consideration reductions called for during the printing process. If the labelling with Letraset is not possible it is done by the publisher in a size adjusted to the scale of reproduction. *In this case lettering must be placed on a transparent cover sheet.* This overlay may also show any edges which should be trimmed off. Lead-lines or arrows may also be drawn on the overlay, an end point should be marked by pricking the original with a fine pin.

The author's name, and instructions regarding the desired linear reduction or magnification should be indicated on the reverse side of the illustration in soft lead pencil. It must be emphasized that the maximum area available for the reproduction of a figure (or an array) is 122×195 mm ($4\frac{3}{4} \times 7\frac{1}{2}$ inches).

9. Tables should be numbered consecutively in arabic numerals. They should be typed on separate sheets.

10. Mailing. Manuscripts and illustrations should be well packed in order to avoid damage in transit.
